How do I Whitelist apps on Android devices?

To Whitelist apps on Android devices:

1. On the MDM Dashboard, visit Step 1 of the MDM QuickStart module and click Android
2. In the Android Policies page, select a device group you want to create this policy for and click Whitelisted Apps
3. Click "Add" and search for the Android app you want to Whitelist
4. Select whether or not you want to make it optional or mandatory and click Add
5. Once you've added your apps to the Whitelist, click Save All Policies
